

# My Benefits Work

## Mobile App & Web Portal

## Drive Employee Engagement With On-Demand Benefit Access

Seamlessly deliver your benefits through our mobile app and web portal. By providing easy access, regular communication, and live chat support, our mobile app and web portal engage employees with their benefits, increasing utilization and keeping your program top-of-mind.

## More Than a Benefit Hub

The app and portal include features that keep employees coming back over-and-over again:

- ▶ **My Wallet** simplifies access to benefit information with a single location to store and view cards for medical insurance, HSA, and more
- ▶ Our pharmacy and dental price transparency tools give employees more control over their healthcare expenses with the ability to proactively compare and view prices
- ▶ **My Insurance** reduces an employee's need to juggle multiple apps by incorporating insurance plan details and contact information

## Keep Benefits Top-of-Mind

Timely emails and push notifications are scheduled regularly to engage members with their benefits, express the value of your solution, and guide them to the mobile app and web portal.

## On-Demand Support

Employees can tap on each benefit for a description of what it is and how to use it, watch a video, and review FAQs. If employees need additional help understanding their benefits, they can talk to a member support representative via chat or phone.
